Version 1.0

TEXA

TERMS AND CONDITIONS

1. DEFINITIONS

MANUFACTURER: the company TEXA S.p.A. with its registered office in Monastier di Treviso (TV), Italy, Via 1° Maggio no. 9.

SALES ORGANISATION: the Retailer TEXA or any other party, natural or legal person, making the sale of the PRODUCTS to the CUSTOMER. MANUFACTURER and SALES ORGANISATION may coincide.

CUSTOMER: the party who purchases the PRODUCTS from the SALES ORGANISATION.

PRODUCTS: the products and services developed and/or manufactured and/or marketed by the MANUFACTURER sold to the CUSTOMER by the SALES ORGANISATION.

CONTACT: the Purchase Order for TEXA products signed by the CUSTOMER and SALES ORGANISATION concerning the PRODUCTS.

2. PURCHASE ORDER, PRICE AND TERMS OF PAYMENT

The price agreed upon between the SALES ORGANISATION and the CUSTOMER includes the sum of the net price agreed upon for the PRODUCTS, plus any accessory expenses. Unless otherwise specified, the VAT is not included in the price. Any additional expenses, such as expenses relative to compliance of the electrical system with norms, bricklaying work, the compressed air system or other intervention necessary for the operation of certain PRODUCTS, are to be charged to the CUSTOMER. If such works are necessary, they must be performed according to the specifications issued by the MANUFACTURER. Payment must be in compliance with the terms set forth in the SPECIAL CONDITIONS or, in the event the terms have not been agreed upon, payment will be made prior to delivery of the PRODUCTS. The term of payment will be considered essential. The SALES ORGANISATION may suspend the delivery of the PRODUCTS listed in the confirmed purchase orders until complete payment by the CUSTOMER of the entire amounts due. If the prepayment is agreed, the SALES ORGANISATION will not proceed to complete the delivery of the PRODUCTS until full payment by the CUSTOMER of the confirmed purchase order. In the event of delays in payment, the CUSTOMER must pay the legal interest rate, plus 4%, on the balance due, as well as any costs sustained for recovery of the credit.

3. DELIVERY, TRANSFER OF OWNERSHIP AND ACCEPTANCE

The term of delivery indicated in the SPECIAL CONDITIONS is approximate. Nevertheless, should the SALES ORGANISATION fail to communicate the availability of the PRODUCT ordered to the CUSTOMER within a period of tolerance of four weeks from the term of delivery indicated, the CUSTOMER will have the right to cancel the order by simple written communication to the SALES ORGANISATION and may require return of the amount paid as a down payment to confirm the order, plus interest, to be calculated at a rate of 4% per year.

The PRODUCTS may be delivered in different lots. The risk of loss of the PRODUCTS is transferred to the CUSTOMER upon delivery of the PRODUCTS. Upon delivery of the PRODUCTS, the CUSTOMER must examine them within eight (8) days to ascertain whether there are any defects or non-conformities. Upon expiry of this term, the PRODUCTS will be understood as having been accepted by the CUSTOMER. If the SALES ORGANISATION agrees to render the PRODUCTS, at their own discretion and with no obligation of any kind, they must be returned in their original condition, with the respective packaging, proof of purchase and with a return note for rendered goods. Costs for return of the goods are to be charged to the CUSTOMER.

4. MODIFICATIONS IN CONSTRUCTION

Due to the constant evolution of technology, the rationalisation of industrial processes and the variability of the components of construction determined by changes in sources of procurement, the PRODUCTS are subject to continuous evolution, which may involve modifications in the construction and may concern the electronic and mechanic parts or aesthetic features of the PRODUCTS (including shade of colour and decorative elements). Additionally, the informative data shown in brochures and publicity documents in general are not binding and indicative only. With the exception of the tolerances admissible by law or custom, the technical characteristics of the PRODUCTS certified in the certificate of homologation are guaranteed by the MANUFACTURER for each instrument produced, with its relative certificate of conformity. In consideration of the above, the CUSTOMER may not refuse the PRODUCT made available by the SALES ORGANISATION to fill the order.

5. PRODUCT WARRANTY

5.1 HARDWARE: The SALES ORGANISATION guarantees the PRODUCT against failures and manufacturing defects ascertained and recognised by the MANUFACTURER's assistance network, for a period of twenty-four months, effective from the date of delivery or activation of the software. The warranty terms may, however, differ for specific types of components and parts of the PRODUCTS. These different warranty terms will be communicated in writing by the MANUFACTURER and/or will be available/accessible in the reserved Area of Service Code program and/or on the website www.texa.it. The warranty consists of the obligation of the SALES ORGANISATION and/or authorised assistance centre to restore the functional efficiency of the PRODUCTS, through replacement or repair of the defective parts, INCLUDED. The warranty does not cover defects or malfunctions due to: a) insufficient maintenance, erroneous calibration, normal wear and tear, accidents caused by third parties, erroneous electrical installation, transformation, modification, tampering, erroneous assembly or disassembly, improper storage; b) software, hardware, interface and any other assembled component used with TEXA PRODUCTS, but not supplied by the MANUFACTURER's official sales and assistance network; c) unauthorised modifications or use not in conformity with the intended use; d) use of the PRODUCTS in an environment that does not satisfy the requirements specified for the PRODUCT; e) erroneous preparation or maintenance of the environment where the PRODUCTS are used.

5.2 SOFTWARE: Although the MANUFACTURER has taken all possible precautions to ensure the accuracy of the information contained and visualised in the software, he/she cannot guarantee that the software or any information contained and visualised therein will satisfy the CUSTOMER's requirements, is devoid of errors, will operate indefinitely and that any defects in the software can be corrected.

5.3 LOCATION WHERE ASSISTANCE IS PROVIDED UNDER WARRANTY: All repairs relative to the warranty, unless agreed otherwise in writing, must be performed at the MANUFACTURER's premises or at the MANUFACTURER's authorised assistance centre. All expenses sustained for the transportation of the PRODUCT to be repaired from the CUSTOMER's premises to the assistance centre and/or for travel of the MANUFACTURER's assistance personnel or of the assistance centre to the premises of the CUSTOMER are to be charged to the CUSTOMER.

5.4 TRANSPORTATION: The warranty does not cover damages sustained during transportation and breakage due to improper packaging performed by the CUSTOMER in the event goods are rendered for repairs.

6. MAINTENANCE

Before delivery to the CUSTOMER, the PRODUCT is tested by the MANUFACTURER and by the SALES ORGANISATION (if scheduled). Nevertheless, the PRODUCTS always require maintenance (such as, for example, inspection of condensation filters and gases in the "gas analyser" product, of the smoke chamber in the "opacimeter" product, of the battery charge in portable PRODUCTS, etc.). The right to service under warranty will be void in the event of failure to perform all of the minimum maintenance interventions as listed in the user manual provided with the PRODUCT.

7. SOFTWARE USER LICENSE

The MANUFACTURER grants the CUSTOMER the right to use the software contained in the PRODUCTS purchased, on the basis of a non-exclusive user's license contract, and for the sole purposes described in the PRODUCT user's manual. For the intents and purposes of the user's license contract, the "software" refers to the programme installed in the PRODUCT and the "license" refers to the right to use or access a certain copy of the specific software. The licensee CUSTOMER must preserve the license contract as proof of his right to use the software, granted by the licensing manufacturer. Should the CUSTOMER licensee fail to accept the terms of the user

license contract, he/she must immediately return the PRODUCT containing the software to the SALES ORGANISATION, together with the material and documentation provided. The software installed in the PRODUCT is the intellectual property of the MANUFACTURER and his/her suppliers. The structure, organisation and code of the software constitute important industrial secrets and are confidential information owned by the MANUFACTURER and his/her suppliers. The software is protected by copyright laws, as well as other laws and international treaties on intellectual property. The CUSTOMER may use only one copy of the software for each user license purchased, or a previous version of the software for the same operating system. THE CUSTOMER is prohibited from:

- A) Renting, transferring, granting sub-licenses, loaning, copying, modifying, reproducing, translating, redesigning, decomposing or disassembling the software obtained with the user's license, or the information contained in it.
- B) Transmitting the software or any part thereof by cable, ether or any other means.
- C) Creating works or deriving others, based even only partially on the software or information contained in it or associated with it.
- D) Using, reproducing, printing or marketing the software or the information contained in it in a manner not contemplated in this agreement.

The license contract is valid until the termination of the software user contract. The contract will terminate upon destruction of the software and its documentation. After use, the CUSTOMER agrees to destroy all copies of the software, whether they are stored on a memory card, on a CD-ROM, HARD DISC or any other memory support, along with the relative documentation. The rights and obligations contained in the user license contract cannot be transferred or transmitted to third parties without the written consent of the MANUFACTURER. The software is installed and used by the CUSTOMER at his own risk and the MANUFACTURER cannot be held responsible, under any circumstances whatsoever, for any loss or damage, including the loss of profit or other losses due to the use or inability to use the software in association with any other program.

It is the CUSTOMER's responsibility to control the possible presence of information technology viruses in the PRODUCTS where the software is installed. The MANUFACTURER accepts no responsibility for losses, damages or costs of any kind caused by the presence of a virus.

8. RESPONSIBILITY

The CUSTOMER is responsible for the use of any instrument and software program made available by the MANUFACTURER and sold by the SALES ORGANISATION. The CUSTOMER promises to indemnify the MANUFACTURER and SALES ORGANISATION and to hold them exempt from any damage caused by improper use of the PRODUCTS (including the software) sold by the SALES ORGANISATION and purchased by the CUSTOMER and use of the PRODUCTS not in conformity with the indications/instructions contained in the programs and User manuals. The CUSTOMER must use all of the data and information obtained by the MANUFACTURER or the SALES ORGANISATION directly or through the programs, User manuals or otherwise made available, in the awareness that such data may not always be exhaustive and must always be used as an integration of the CUSTOMER's own professional knowledge. Some PRODUCTS of the SANITATION CATEGORY, and in particular the products of the AIR2SAN range, are intended to be used by technicians specialised in the sanitation field and by personnel properly trained in environment sanitation operations using ozone. It is of the utmost importance that before using the PRODUCTS, the CUSTOMER and/or any person and/or user of the PRODUCTS carefully reads and understands all the instructions, warnings and information on the use of the PRODUCTS that are indicated both in the User manual of the PRODUCTS and in the information/communications/instructions made available by the MANUFACTURER even via media (Internet website, social media, etc.).

9. TRANSFER OF THE CONTRACT

In the event of termination, for any reason, of the contractual relationship of the authorised Retailer and assistance centre for TEXA products (SALES ORGANISATION), the right to designate another authorised TEXA SALES ORGANISATION, which will take over this contract, will be irrevocably conferred upon TEXA. This transfer will be effective upon the date of communication to the CUSTOMER. The SALES ORGANISATION will remain owner of all rights and obligations arising prior to the date of transfer. Upon signature of this Contract, the CUSTOMER accepts the transfer of this Contract from the SALES ORGANISATION to TEXA or to another authorised SALES ORGANISATION designated by TEXA.

10. FORCE MAJEURE

Delays in fulfilment of contractual obligations may be justified by events which delay the process of manufacture, distribution or repair, such as suspension of work, labour union unrest, supervening and unforeseen productive capabilities of the MANUFACTURER, suspension of transportation services or the supply of energy, provisions enacted by the Public Administration, natural calamities or other causes due to force majeure or fortuitous events, which may take place at the MANUFACTURER's or his suppliers' premises, during transportation or at the premises of the SALES ORGANISATION.

11. CONFIDENTIALITY AND CUSTOMER'S OBLIGATIONS

Both Parties promise to hold the information of a technical and commercial nature, exchanged within the ambit of this sales contract or during the phase of preparation of the contract, as strictly confidential, and to refrain from divulging such information to third parties without the prior written consent of the other Party. This obligation will remain, with no time limit. The CUSTOMER also makes a commitment hereunder, not to purchase the PRODUCTS as a representative, agent or solicitor of the MANUFACTURER's competitors.

12. PROCESSING OF PERSONAL DATA

The processing of the personal data communicated by the CUSTOMER to the MANUFACTURER or SALES ORGANISATION (hereinafter "CUSTOMER Personal Data") to fulfil the Contract, will take place in compliance with Regulation (EU) 2016/679 (General Data Protection Regulation, hereinafter "GDPR"), with the Policy on Customer Personal Data processing provided to the CUSTOMER pursuant to art. 13 GDPR and by virtue of the consent to the processing of the data expressed here by the CUSTOMER. The owner of the processing of the CUSTOMER's Personal Data is the company TEXA S.p.A, with its registered office in Monastier di Treviso (TV), Italy, Via 1° Maggio no. 9. ("Owner of the Processing"). The person in charge of the CUSTOMER's Personal Data, for the purposes of the exercise of the rights that the current legislation on data protection established for the persons concerned, is Mr. Gianluca Bidoglia (email: privacy@texa.com).

In order to guarantee the fulfilment of the contractual obligations, the Owner of the Processing will communicate the CUSTOMER's Personal Data to the SALES ORGANISATION that will process it as independent owner. The consent to the processing of the CUSTOMER's Personal Data can be collected (i) in paper copy, after the CUSTOMER signs the attached declaration of consent that will be provided by the SALES ORGANISATION upon signing the first purchase order for the PRODUCTS; and/or (ii) telematically, upon the first transmission of the IDC5 software contained in the PRODUCT, after the CUSTOMER fills in the declaration of consent that appears in the pop-up screen along with the policy. In addition to the foregoing, the MANUFACTURER will process, in quality of the OWNER of the Processing, the CUSTOMER's Personal Data for the transmission of newsletters and/or for and profiling purposes only upon the preliminary free and expressed consent by the CUSTOMER that can be collected using the methods described above.

13. COMPLEMENTARY AGREEMENTS

Any additional agreements or agreements made as an exception to these conditions of sale, are binding only if they are stipulated in writing. The CUSTOMER acknowledges that the SALES ORGANISATION has no powers of representation of the MANUFACTURER.

14. JURISDICTION

This Contract will be regulated by Italian Law and the exclusively competent court will be the district in which the SALES ORGANISATION has its legally registered office.

D14110

DoIP NODE

DoIP NODE is the adapter created by TEXA dedicated to the ultra-quick diagnosis. Once the application is installed, the device can be connected to the diagnostic interface and diagnostic operations can be carried out on the vehicles the support the UDP/TCP ISO 13400 communication protocol, for all the makes in which the communication among the control units does not take place only via CAB BUS, but also via ETHERNET BUS.

A TEXA vehicle interface must be purchased

€ 380,00

NOTE:

S17350

CAN FD adapter for NAVIGATOR TXT MULTIHUB and NAVIGATOR TXT with Cortex¹ technology

The CAN FD adapter is designed to connect to the compatible TEXA diagnostic interfaces to allow communication with the vehicles equipped with the CAN FD communication protocol, thus supporting both the PassThru operation and complete diagnostic work on those vehicles equipped with multi-channel technology. As a result, the PassThru operations are possible on those FCA vehicles with this architecture.

**A vehicle interface
and a sw license are required**

€ 150,00

TPMS SOLUTIONS

D13340

TPS2

Latest generation tool for managing the TPMS sensors and their programming in the control unit. TPS2 can easily read the sensors thanks to the power antenna it is equipped with. It has a wide display coloured display that allows reading all the information from the wheels in the same screen. It is also equipped with a high-definition camera that allows, among other things, reading "QR codes" in order to quickly recall the information regarding the services carried out previously.

NEW

RCCS 3 EVO with monitor¹

Multifunctional unit for multi-brand calibration of radars and cameras equipped with 75" 4k monitor and mini-PC for fully automatic digital projection of front camera panels. The new reinforced and optimized structure enables greater ease, accuracy and safety during the guided positioning procedure within the IDC5 software thanks also to direct communication with Bluetooth distance measurers.

REMOTE DIAGNOSIS

D13620

eTRUCK

eTRUCK is the innovative solution that takes the industrial vehicle workshop into a new dimension. With eTRUCK, the workshop can constantly monitor the vehicle status remotely, manage its servicing predictively and, an absolutely new feature, perform adjustment functions that allow restoring the vehicle's optimal conditions. Package contains 5 eTRUCK.

SOFTWARE AND INTEGRATIONS

All software are downloadable from the Internet

System requirements for software installation on PC

Dear user,
the information may change without notice: we recommend that you always consult the SYSTEM REQUIREMENTS - TEXA S.p.A. website on the page www.texa.com/system/

IDC5 is compatible with the following Microsoft™ operating systems:

- Windows 10
- Windows 11

The IDC5 versions compatible with the Windows 11 operating system are:

- IDC5 CAR 75 and following
- IDC5 TRUCK 52 and following
- IDC5 BIKE 35 and following
- IDC5 MARINE 17 and following
- IDC5 OFF HIGHWAY 23 and following

The operating systems Windows RT /Windows 10 S / Windows 10 LTSC 2015 / Windows 11 SE and Windows Insider Preview builds are not supported. This software is not compatible with devices based on an ARM processor and equipped with a Windows 10 / Windows 11 operating system.

Requirements that are Common to all supported Operating Systems

Requirement	Minimum	Recommended
Free Space on HARD DISK	7 GB	12 GB
Screen Resolution	1024 x 768 pixel	-
DVD player	Yes	-
USB Ports type A	2	2
Internet Connection	Yes	Yes
Bluetooth 2.1 or higher	No	Yes
Wi-Fi	No	Yes
RAM	4 GB	8 GB
System	64bit	64 bit

The request for space on the hard disk refers to a single diagnostic environment for its first installation.

The recommended space takes into account the possibility to update the software to higher versions.

The Internet connection is necessary (and mandatory) in order to access the on-line services, perform updates, etc.

In order to optimise the use and reduce the risk of possible compatibility problems, we recommend that this software be installed on a PC that is dedicated exclusively to workshop use.

A16350

TXR ID

TXR ID is the new portable refrigerant gas identifier that allows identifying the type of refrigerant, R134a or R1234yf, in the vehicle or in the charging cylinder and checking its purity. It is equipped with a built-in software interface, a 5.4" touch screen display, built-in Bluetooth and Wi-Fi modules and an activated carbon filter designed by TEXA for analysis that is not compromised by external factors.

ENGINE CLEANING

H175A0

H2 BLASTER

H2 BLASTER is the innovative solution for the decarbonisation of combustion engines. Using the combined power of hydrogen and oxygen, it fully cleans the components involved in the internal combustion process and restores the engine’s optimal performances, reducing at the same time consumptions and harmful emissions. It has a 10” touchscreen display and built-in Bluetooth and Wi-Fi modules.

SANITATION

G16050

AIR2 SAN

AIR2 SAN is a sanitiser entirely manufactured in Italy which introduces important innovations aimed at guaranteeing the best possible elimination of viruses, bacteria, and mildews. It is characterised by its completely automated process, which adjusts the saturation in the environment based on the ozone density, temperature and air humidity sensors. Once the procedure is complete, AIR2 SAN retransforms the residual ozone into oxygen, guaranteeing an immediately liveable and safe environment. AIR2 SAN is equipped with a powerful suction filter, designed to avoid the passage of particles towards the ozone generator.
